Local  
Community

Analyze with Garden the Indigenous uses and purposes of plants we are using

Finalize story and aspects of digital and pamphlet versions of tour

Communicate thoughts and plans with people in community and listen to thoughts

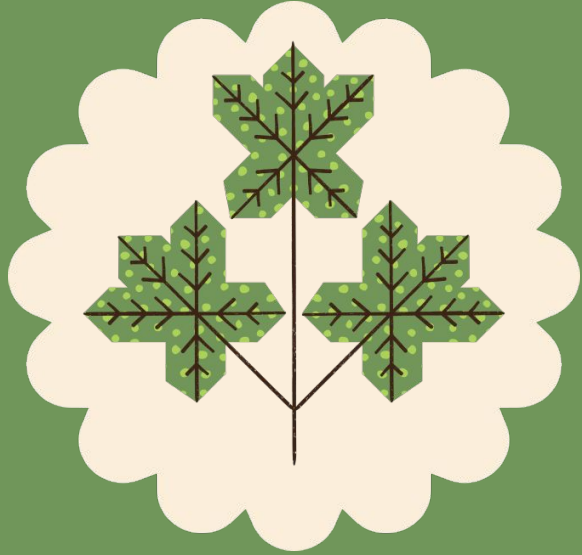

Formulate pamphlet for non-digital version of tour

Meet w/ Garden partners about implementation

Begin implementation of tour and pamphlet

# Timeline

# Team

- Indigenous information of certain plants (uses, properties, etc)
- Printed indigenous pamphlet showcasing the tour.
- QR codes put on certain plants within the garden.
- Adding our own personal information to the MOBOT website and app .

# MOBOT

- Outreach within team (Sean & Ashley)
- Stable communication.
- A list of sources to be able to build this story.

# Project Scope

We are taking the current “Native Plants” tour from the My Guide to the Garden website and updating it and giving an Indigenous perspective which it is currently missing.

We want to take the current plants on the tour and add more indigenous knowledge, like its name and different types of uses (ritual, communal, medicinal, etc).

We also want to make a pamphlet version of the tour, so visitors can do the tour without a phone.
