

## HOW TO GET PEOPLE INTERESTED IN ENVIRONMENTAL CONSERVATION THROUGH EDUCATION?

To get people interested in environmental conservation through education, make it hands-on and action-oriented by involving them in local projects like cleanups and tree planting. Use engaging digital media like documentaries and social media campaigns to raise awareness, and incorporate local issues to show direct impact. Empowering people with responsibility, encouraging peer-to-peer learning, and fostering a sense of community ownership are also key to creating lasting interest and action.
