

Are you aware of water conservation practices and have you ever partaken in any water practices? Why is that?

Line 1: I've never cared

Conducted

What does water sustainability practices mean to you?

Line 2: In the grand scheme of things probably like absolutely nothing

How does the motivation of others help you get engaged in sustainability?

Line 3: You see nobody that I know was motivated in that so I would say it doesn't motivate me at all

What water the water conservation practices implement in your day-to-day lives like for example water collection stormwater management like planting anything?

Line 4: So yeah, my family we don't do that we put mulch down we mulch but that's when like the mulch gets old and it starts looking bad so that's the only thing I know about mulching if I'm being honest we don't collect water that's all

What are some key factors that you believe contribute to your knowledge of water quality or water retention practices? If you don't know about water quality or retention, what do you think that is?

Line 5: I think water quality cause I don't know at all actually if I'm being honest I think water quality has something to do with like how good the water is yeah that's what was the second part ohh if you don't know about water quality or water retention why do you

think that is why do I not know about it well to be honest this is my first time hearing about it so I think like nobody really cares maybe and like maybe that should be like brought to more people's attention on a wider skin

What can be a way that would help young adults engage in sustainable work practices?

Line 6: Probably like teaching them about it in the first place like after school and stuN like that I don't know if kids will be too interested yeah probably like in a very young age cause like you're going to have to do that in young age so like kids at a younger age like elementary school or something like that because when they're at a younger age they'll be more willing to learn about something like that kids are willing to learn anything at that time of age not now it was too late

How can communities work together to promote sustainable water management and protect local water resources?

Line 7: Don't know being smart with water like rain water okay rainwater isn't like idea that we talked about a lot so like when you talk about
